Draw the graph of $y = 2.5 \times 2^{-x}$ for values of x from -2 to 2

Solve $2 + \sin\theta = 1.35$ for $0^\circ \leq \theta \leq 360^\circ$

Solve the simultaneous equations

$$2x - 4y - 2z = 10$$

$$5x - y - 8z = 1$$

$$7x - 5y - 4z = 5$$
