

$\text{£}3 \times \text{number of miles}$

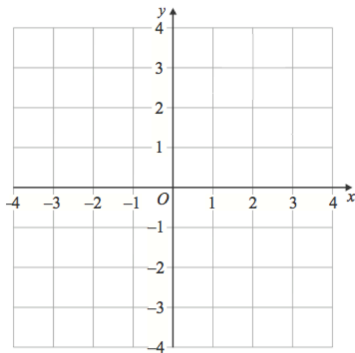

The formula above shows how to work out the cost of a taxi journey.

Work out the cost of an 8 mile journey

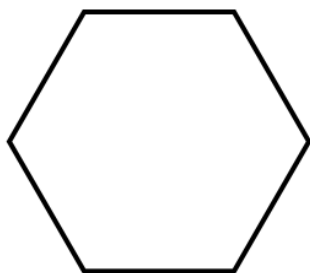

Work out the cost of a 27 mile journey

A journey costs £54.
Work out how far it was.

Write 0.06 in words.

Plot the point with coordinates
(1, -2)

Shown is a regular hexagon.

On the diagram draw all the lines of symmetry
