

Work out the missing number

$$\square - 7 = -6$$

Two angles in a triangle are
50 degrees and 36 degrees.

Calculate the third

$$20\% \text{ of } 30 = \underline{\quad}$$

$$50\% \text{ of } \underline{\quad} = 30$$

p and q are odd numbers

Is p + q

odd

even

either

Is pq

odd

even

either

Make w the subject

$$aw + 7 = c$$
