

Match each statement to the correct expression.

Multiply c by 2 then add 1

$c + 2$

Square c then add 1

$2c + 1$

Add 1 to c then multiply by 2

$2(c + 1)$

Square c then subtract from 1

$c^2 + 1$

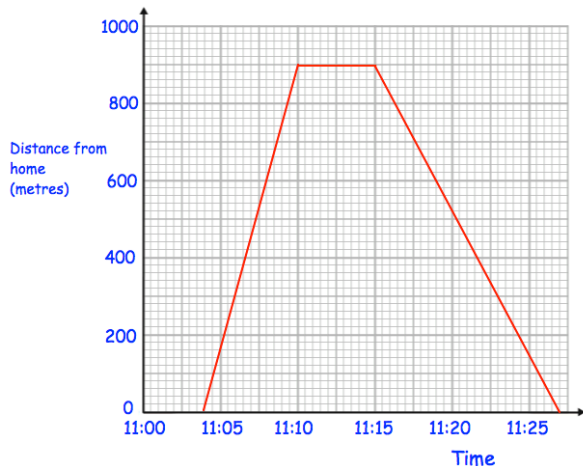

$c^2 - 1$

$1 - c^2$

Iris has £1.65
Ravi has 75p

How much money must Iris give Ravi so that they end up with the same amount?

Three whole numbers have a mean of 20.
None of the numbers are equal to 20.
Write down three possible numbers.

How long did Rebecca stop for?

How far did Rebecca travel in total?
