

Vicky buys an ice cream for €2.16 in Berlin.

The exchange rate is £1 = €1.60

Find the cost of the ice cream in pounds.

$$2.16 \div 1.6 = 1.35$$

$$£1.35$$

Calculate the nth term for

2, 7, 12, 17, 22

$$5n - 3$$

Using the nth term, work out the 100th term

$$500 - 3 = 497$$

Country	Frequency	
France	3	60°
Wales	4	80°
England	11	220°

18

$$360 \div 18 = 20$$

Jayden is drawing a pie chart.
Work out the size of each angle.

Shape	A	B	C	D
Order of rotational symmetry	1	4	5	1

Expand $5(y + 4)$

$$5y + 20$$

Expand $2(3y + 1)$

$$6y + 2$$
