

Match each statement to the correct expression.

Multiply  $c$  by 2 then add 1

Square  $c$  then add 1

Add 1 to  $c$  then multiply by 2

Square  $c$  then subtract from 1

$c + 2$

$2c + 1$

$2(c + 1)$

$c^2 + 1$

$c^2 - 1$

$1 - c^2$

Iris has £1.65  
Ravi has 75p

How much money must Iris give Ravi so that they end up with the same amount?

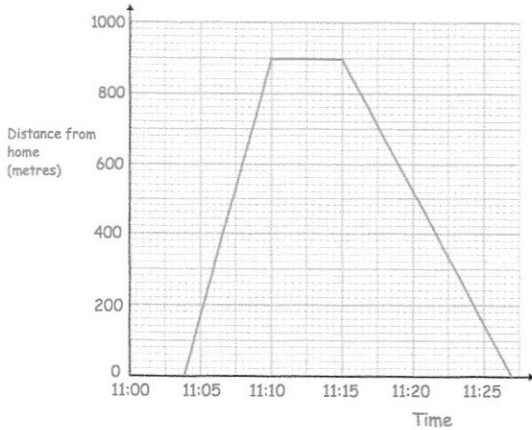

$165 - 75 = 90$

$90 \div 2 = 45p$

Three whole numbers have a mean of 20.  
None of the numbers are equal to 20.  
Write down three possible numbers.

18, 19, 23

any 3 numbers that add up to 60, with none equal to 20.

How long did Rebecca stop for?

5 minutes

How far did Rebecca travel in total?

$900m \times 2$

1800m

or 1.8 km
