

Write down an algebraic expression for  
p multiplied by m

$$mp$$

3 less than p

$$p-3$$

Shown below are two stacks of identical blocks

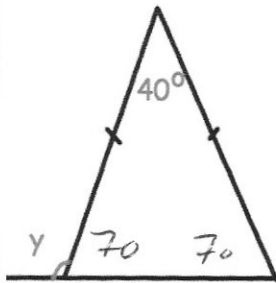

Find the height of the second stack.

$$64 \div 4 = 16$$

$$16 \times 5 = 80 \text{ cm}$$

$$=$$

$$180 - 40 = 140$$

$$140 \div 2 = 70$$

$$180 - 70$$

Find y

$$110^\circ$$

Simplify

$$m^6 \times m^2$$

$$m^8$$

Simplify

$$\frac{m^{10}}{m^2}$$

$$m^8$$

Shown below are the ages of some friends.

Age	Frequency	$f \times x$
7	3	21
8	5	40
9	+ 2	+ 18
	<u>10</u>	<u>79</u>

Work out the mean

$$79 \div 10 = 7.9$$
