

Write these numbers in order of size.
Start with the smallest number.

60% $\frac{1}{2}$ 0.3 $\frac{3}{4}$ 0.4

Simplify $4x + 3y - 2x + 5y$

If £1 is \$1.50

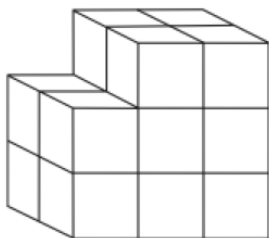

Change £4 into dollars.

Change £100 into dollars.

Change \$4.50 into pounds.

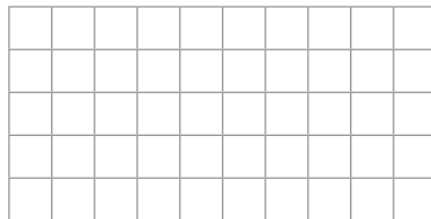

Change \$30 into pounds.

The diagram below shows a shape made with centimetre cubes.

Front

On the centimetre square grid, draw the front elevation.

On the centimetre square grid, draw the side elevation.
