□	□	□	□

Find the row and column totals.

Simplify fully

$$\frac{21}{28}$$

$$4.2 - 1.82$$

Musa buys a ruler for 80p and two pencils.
Both pencils cost the same price.

Musa pays with a £10 note and receives £7.70 change.

How much does one pencil cost?

James is running in a 5 kilometres race.

He has run 300 metres.

How much further, in metres, must he run?
