Numeracy 5-a-day

Corbettmαths

A rule for a sequence is
"half the previous number."

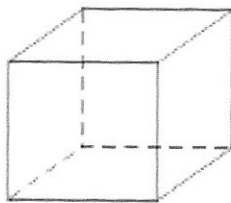

40 20 10 5 2.5

Find the two missing numbers

What percentage of the shape is
not shaded?

Shade $\frac{1}{4}$ of this shape

How many faces does the cube
have?

6

How many vertices does the cube
have?

8

Shown above is a cube

Work out

$\frac{3}{4}$ of 44m

$$44 \div 4 = 11$$

$$11 \times 3 = 33$$

33 m

400 of 600 students in a school have
school dinners.

What fraction of the students have
school dinners?

Simplify your answer.

How many **do not** have school
dinners?

200

$$\frac{400}{600} = \frac{2}{3}$$
