

A pizza costs £7.35
Jim pays with a £10 note.

How much change should he receive?

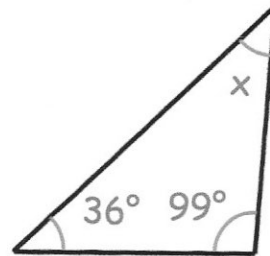

£ 2.65

Find the size of the angle x.

$$99 + 36 = 135$$

$$180 - 135 = 45^\circ$$

45°

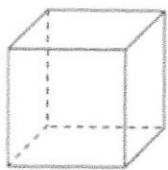

Four tickets for a trip cost a total of £700.

Work out the cost of one ticket.

$$700 \div 4 = 175$$

Draw a 155 degree angle

Shown is a cube

How many faces does a cube have?

6

How many edges does a cube have?

12
