

55% students in a school have a locker.

There are 300 students in the school.

What fraction of students **do not** have a locker?

How many students have a locker?

Work out $\sqrt[3]{64}$

The distance between two cities is 2898 miles.

The plane journey took 6 hours.

Calculate the average speed of the plane.

Two fair six-sided dice are rolled.
The score is **difference** between the numbers on each dice.

Complete the table to show all possible scores.

		Dice 1					
		1	2	3	4	5	6
Dice 2	1	0	1				
	2	1					
	3	2					
	4						
	5						
	6						

Find the probability of scoring a 2

Find the probability of scoring a number less than 3
