

How many centimetre cubes are needed to fill the box?

Using the information that
 $47 \times 23 = 1081$
 write down the value of

4.7×23

47×230

Serves 6 people

1 kilogram of mince
 400 grams of tomatoes
 3 chillies
 600 grams of kidney beans

How many grams of tomatoes would be needed for 15 people?

8 boys and 8 girls from a class run 100m.

The times taken, to the nearest second, for each girl are:

15 20 24 18

19 21 26 29

The mean of the boys' times is 25 seconds.

The range of the boys' times is 14 seconds.

Thomas says that "the boys in our class are faster than the girls."

Is he correct?
