

The sum of the interior angles in a polygon is 7380°

Calculate the number of sides the polygon has.

Solve $x^2 - 3x - 10 = 0$

Find the size of AC.

The number of visitors to a museum fell by 8% from March to April.
In April, 51520 people visited the museum.

How many people visited the museum in March?

Work out

$$3^4 \times 9^{-2}$$
