

Write 708% as a simplified fraction

Farmer Richards owns this field.
The crop he plants earns him £7 for each square metre.
How much money does he earn in total?

Solve $x^2 + 10x - 39 = 0$

$$(a + c)^3 = t$$

make c the subject

Charlie and Ruma share some money in ratio 2 : 5

Ruma gets £216 more than Charlie.

How much does each person receive?
