

Solve

$$\frac{4(x - 2)}{3} = 5 - 2x$$

Find the length of side AC.

Solve the simultaneous equations

$$2x - 5y = 1$$

$$8x + 3y = 73$$

Find the volume of a piece of wood that has a mass of 600g and density of 0.75g/cm^3

A number, c , has been rounded to two decimal places.

The answer is 0.74

Write down the error interval for c .
