

Find the probability that on a day selected at random, it is **rainy** and the bus is **late**.

In a small village, one bus arrives a day. The probability of rain in the village is 0.3. If it rains, the probability of a bus being late is 0.4. If it does not rain, the probability of a bus being late is 0.15.

Find the probability that the bus is **on time**

Solve

$$5y + 3 < 28$$

A sphere has a diameter of 6cm. Find the volume of the sphere.

4 schools send an equal number of students to a languages course. One of the schools sent both French and German students. The ratio of French to German students it sent was 1 : 3 The school sent 21 German students.

Work out the total number of students sent to the languages course.
