

A water tank is two-thirds full. A quarter of a full tank is poured out.

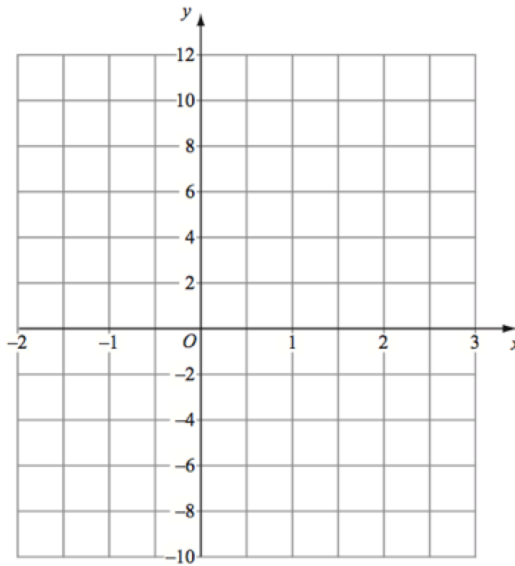

What fraction of a tank is left?

Calculate angle y

Complete the table of values for $y = x^2 - 2x$ from $x = -2$ to 3

x	-2	-1	0	1	2	3
y						

On the grid, draw the graph of $y = x^2 - 2x$ for the values of x from -2 to 3.

Expand and simplify

$(5w + 1)(3w + 2)$

Expand and simplify

$(y - 8)^2$
