

Write down an estimate for  $\sqrt{74}$

Last month Tolga weighed 80kg  
This month Tolga weighs 78kg  
Calculate the percentage decrease.

Solve

$$\frac{8x - 3}{3} = 6x$$

$\xi = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12\}$   
 $A = \{\text{numbers greater than 6}\}$   
 $B = \{\text{prime numbers}\}$

Draw a Venn diagram for this information.

Find x
