

7th March

Foundation Plus 5-a-day

Corbettmaths

Work out

$$5\frac{1}{12} - 1\frac{2}{3}$$

$$\frac{61}{12} - \frac{5}{3}$$
$$\frac{61}{12} - \frac{20}{12}$$

$$\frac{41}{12} = 3\frac{5}{12}$$

Give your answer as a fraction.

A number, y , is rounded to the nearest 10 to give 50.

Write down the error interval for y .

$$45 \leq y < 55$$

Complete the table of values and draw

a graph of $y = \frac{1}{x}$

x	0.5	1	2	3	4	5
y	2	1	$\frac{1}{2}$	$\frac{1}{3}$	$\frac{1}{4}$	$\frac{1}{5}$

Work out 2^{-3}

$$\frac{1}{2^3} = \frac{1}{8}$$
