

The population of a country is 9.08×10^5
Write the population of the country as an ordinary number.

Last year the population was 2% less.
Work out the population last year

Find x

Carl is filling flowerpots with soil.

Each flowerpot is a cylinder with radius 7cm and height 20cm.
Carl has 50 litres of soil.

How many flowerpots can be filled?

Work out $2^{-3} \div 3^{-2}$
