

Factorise  $y^2 - 64$

The diagram shows two lighthouses.  
 A boat is within than 6 miles of lighthouse A.  
 The same boat is within 4 miles of lighthouse B.  
 Shade the possible area in which the boat could be.

Shown below is a regular pentagon ABCDE.

Work out angles  $x$  and  $y$

Calculate the gradient of the straight line passing through  $(0, 3)$  and  $(4, 11)$ .

Write down the equation of the line.
