

Expand and simplify

$$(y + 6)(y - 7)$$

Factorise fully

$$36y^3 - 24y^2$$

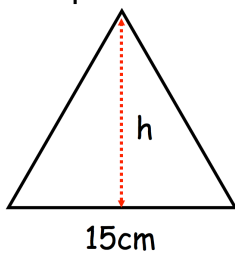

Write 0.00000092 in standard form.

Write 150×10^6 in standard form.

A circle has circumference 80cm.

Find the area.

Below is an equilateral triangle.

Calculate the height of the triangle.

Find the area of the triangle.

It takes 6 hours for 20 workers to seed 40 acres.

How long would it take 10 workers to seed 90 acres?
