

Work out

$$\left(2\frac{1}{2}\right)^2$$

Calculate the density of block of metal with volume  $40\text{cm}^3$  and mass  $220\text{g}$

Solve the inequality  $3(x - 4) \leq 18$

A line has equation  $y = 3x - 12$

Write down the point where the line crosses the y-axis.

Write down the point where the line crosses the x-axis.

Find the perimeter of the sector.
