

Draw  $y = x^2 - 2$  and draw  $y = 2x + 1$ .

Write down the coordinates of where the two graphs intersect.

x	-2	-1	0	1	2	3
y	2	-1	-2	-1	2	7

$(-1, -1)$

and

$(3, 7)$

Find x

$61^\circ$

Simplify

$$\frac{a}{c} \div \frac{d}{5} = \frac{a}{c} \times \frac{5}{d} = \frac{5a}{cd}$$

Write the numbers 2, 3, 4 and 5 into the boxes to give smallest possible answer.

$$\boxed{2} \frac{\boxed{3}}{7} \div \boxed{5} \frac{1}{\boxed{4}}$$
