

Simplify fully

$$\frac{\sqrt{84}}{\sqrt{7}}$$

m is an irrational number such that

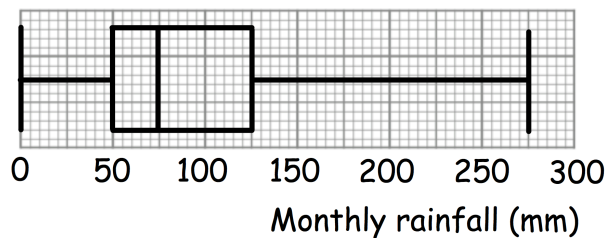

$$3 < m < 4$$

Write down a possible value of m

Simplify $(3w^7)^3$

The box plot shows information about the monthly rainfall in a city over 100 years.

Find the range

Jonah and Ruby look up how much rainfall there was in the months that they were born.

What is the probability both months had less than 50mm of rainfall?
