

The cumulative frequency curve shows information about pocket money received.

Find an estimate of the median

Find an estimate of the interquartile range.

Find x, y and z

M is directly proportional to the square of A.

When $M = 200$, $A = 2$.

Find M when $A = 4$.

Simplify

$$\frac{a^{\frac{1}{5}} \times a^{\frac{2}{3}}}{a^{\frac{3}{5}}}$$
