Find y

Line 1 has equation $y = 4x - 1$
 Line 2 has equation $2y - 8x + 7 = 0$

Show these lines are parallel

Find x

h is directly proportional to the square of w .

When $h = 24$, $w = 2$.Find the value of h when $w = 4$.

Solve

$$\frac{10x - 3}{3} + \frac{5x + 2}{4} = 5$$
