

Work out $16^{0.5}$

The heights of 6 sunflowers are listed below.
Each height is given to the nearest centimetre.

126cm 108cm 179cm

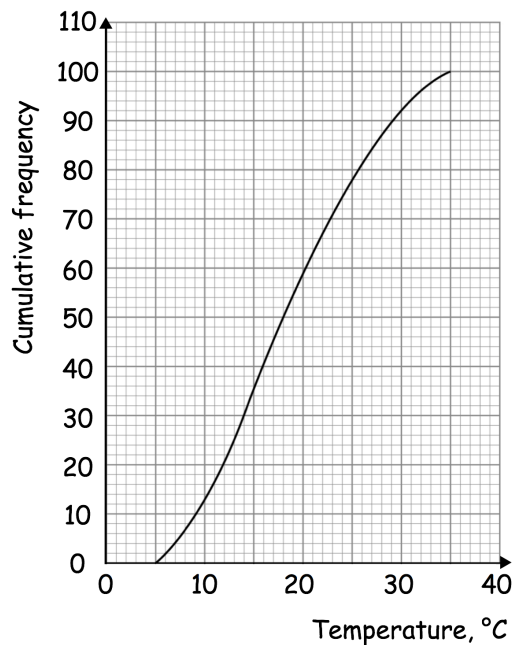

201cm 97cm 144cm

Work out the error interval for the mean height, m.

w is directly proportional to a^2

When $w = 50$, $a = 10$

Find w when $a = 5$.

Find an estimate of the interquartile range.

Estimate how many days have a temperature over 30°C
