

Simplify fully $\frac{2x^2 - 2}{6x - 6}$

Show $A' \cup B'$ on the Venn diagram.

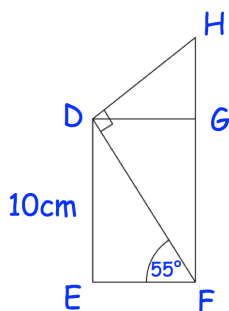

A shopkeeper normally sells his goods at 80% above cost price.

In a sale he reduces his prices by 40%.

What percentage profit does he make on goods sold in the sale?

A rectangular playground is 10m longer than it is wide.

The area of the playground is 375m²
Calculate the width and length of the playground.

DE = 10cm
Angle DFE = 55°
Find the length of FH
