

12 biscuits weigh 220g.
There are 412 calories in 100g of biscuits.
How many calories are in one biscuit?

Simplify fully

$$(\sqrt{3} + 1)(\sqrt{3} - 1)$$

Make y the subject

$$y + 7 = x(y + 4)$$

A fair six sided dice is rolled three times.

Find the probability of getting no sixes.
