P _____ 50cm _____ Q

2m

R

Calculate the length of PR.

W is inversely proportional to A squared.

When W = 10, A = 2.

Find W when A = 4.

Work out $36^{\frac{1}{2}} \div 4^{-2}$

Write down the interquartile range

Score: 0 10 20 30 40 50

Expand $\sqrt{10}(5 + \sqrt{10})$
